WHAT HAPPENED

Grossman Law Offices dropped from position #12 to #18 between scans, a loss of 6 ranking positions. During the same period, three direct competitors gained reviews: Thompson Law added 17 reviews, Anderson Injury Lawyers Dallas added 6 reviews, and Mullen & Mullen Law Firm added 6 reviews. Your profile accumulated only 3 reviews over 15 weeks, a rate of 0.2 reviews per week.

WHY YOU SLIPPED

- [HIGH CONFIDENCE] Frenkel & Frenkel Law, now ranked #13, gained 22 reviews during the scan period while your profile gained only 3 reviews. Review volume is a primary ranking signal in local search, and competitors are accumulating social proof at a significantly faster rate.
- [HIGH CONFIDENCE] Your review velocity of 0.2 per week is substantially slower than your recent measured rate of 5.4 reviews per week recorded over 8 weeks in an earlier period. This deceleration in client feedback submission likely contributed to your loss of ranking momentum.
- [MEDIUM CONFIDENCE] Fourteen competitors above your current position hold ratings of 4.8 or 4.9 stars, while your rating is 4.7 stars. Your competitive rating gap, though narrow, persists alongside your review volume deficit.
- [MEDIUM CONFIDENCE] The broader rank trend shows volatility rather than consistent decline. Your positions over 10 scans range from #12 (best) to #20 (worst), with recent weeks at #12, #12, and #18. This pattern suggests ranking instability rather than a permanent drop.

YOUR STANDING

Confidence score is 10/10, meaning this data is complete and reliable. However, the 6-position drop occurred within a single week of measurement. Given your demonstrated ability to reach #12 in recent scans, this drop may represent normal weekly fluctuation rather than a sustained trend. Monitor next week's scan before committing to major changes.

HOW YOU COMPARE IN YOUR CATEGORY

By review volume you are in the 90th percentile of your 20-listing pack -- ahead of most of your market. The category leader holds 4,700 reviews; the typical competitor holds 552.

You already hold more reviews (2,700) than the 17 listings ranked above you (avg 1,070). That points away from raw review count and toward proximity, your primary Google category, review recency, and profile activity as what is moving your rank. The recovery plan targets exactly those.

WHO'S MOVING

- Your pack has been stable this window. Stability is an opportunity: a steady push on reviews and profile activity can move you up while rivals hold still.
