YOUR STANDING

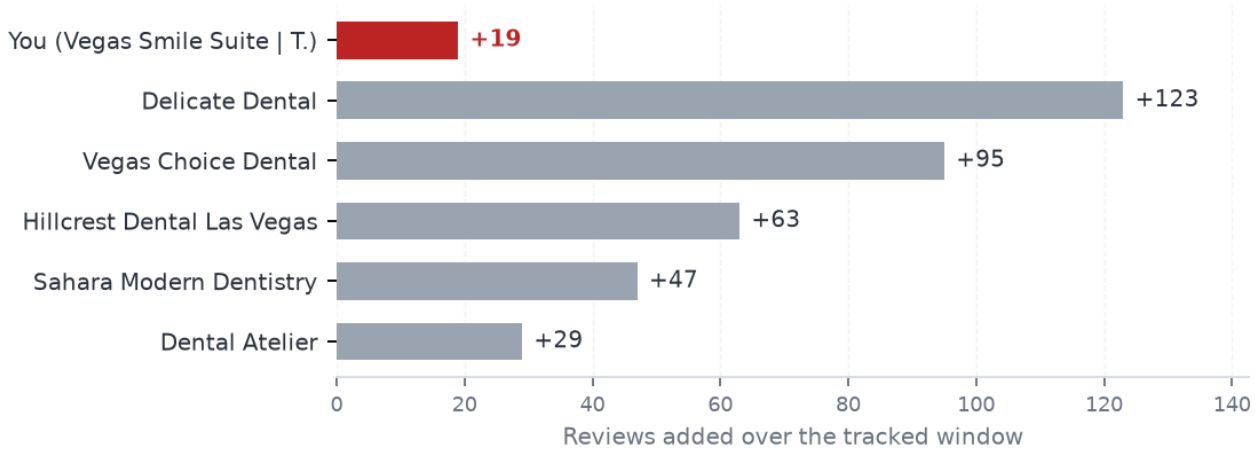

Confidence score is 10/10 based on complete data collection across all metrics. The scale and consistency of the data suggests this ranking drop reflects real market movement rather than measurement noise. However, given the volatility in your 14-week history, waiting for one additional week of data before major restructuring decisions would clarify whether this #14 position stabilizes or bounces back toward #5-#9 range.

Your Recovery Plan

October 22, 2026

DO THIS NEXT

1. Establish a review request system targeting recent cosmetic procedure patients. Why now: Your review velocity of 1.36 per week lags behind climbing competitors who are accumulating reviews at higher rates; closed-loop requests typically improve capture rates by 20-40% in dental practices. Effort: Low. Expected impact: High.
2. Audit and complete all Google Business Profile sections (photos, service menu, Q&A, business hours consistency). Why now: At rank #14, visibility captures only 0.8% of category searches; profile completeness signals affect local algorithm weight, particularly when review volume is a ranking factor. Effort: Low. Expected impact: Medium.
