WHAT HAPPENED

Noble Black & Partners Real Estate dropped from rank #9 to rank #15 on July 30, 2026, a loss of 6 positions over the measured period. During the same window, three direct competitors gained new reviews (Brian K. Lewis gained 1, LEVEN Real Estate gained 1, Sydney Blumstein gained 2) while your profile received no new reviews this week. Your review velocity over the full 9.9-week scan period stands at 0.1 reviews per week, generating only 1 new review across the entire timeframe.

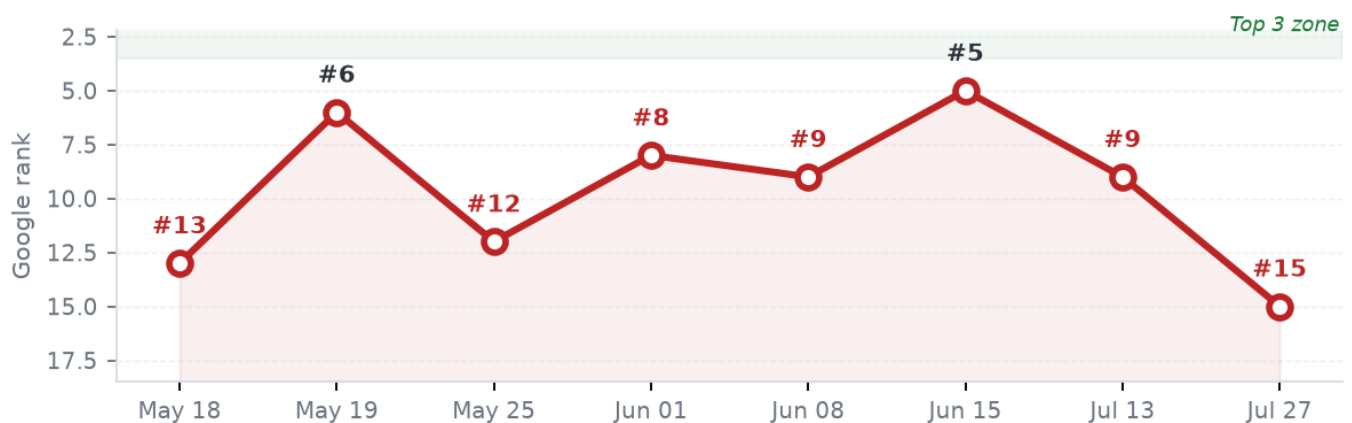

WHY YOU SLIPPED

- [HIGH CONFIDENCE] Competitors above you are accumulating reviews while your profile is not. Google's local algorithm weights review velocity as a ranking signal; the data shows zero reviews added this week against competitor activity, and your cumulative rate of 0.1 reviews per week is well below market momentum.
- [HIGH CONFIDENCE] Your business profile is missing required information. Our scan detected that business hours are not set on your listing, which typically results in lower local ranking performance compared to complete profiles.
- [MEDIUM CONFIDENCE] Multi-week rank volatility suggests instability in your local visibility. Your positions over 8 scans ranged from #5 (best) to #15 (worst), with the trend line declining; this pattern indicates your rankings are becoming less stable rather than consolidating.
- [MEDIUM CONFIDENCE] The fastest-climbing competitor, The NYC Luxury Homes (By Appointment Only), moved from untracked position to #4 (+12 positions) without gaining reviews, suggesting algorithm shifts or profile completeness may have favored them independent of review volume.

YOUR STANDING

Confidence score is 10/10 based on complete data collection over the period, meaning this rank drop is reliable and not a measurement artifact. The sustained decline over multiple weeks indicates a real visibility loss that warrants attention.

DO THIS NEXT

- 1. Add business hours to your Google Business Profile immediately. Why now: Our scan flagged missing hours as a completeness gap, and incomplete profiles rank lower in local results. Effort: Low. Expected impact: High.
- 2. Develop a systematic process to generate 2-3 reviews per month from past clients. Why now: Your velocity of 0.1 reviews per week is stagnant; competitors are actively adding reviews, and the category benchmark shows leaders have 262 reviews vs. your 96. Effort: High. Expected impact: Medium.
- 3. Audit your profile against the top-4 ranked listings for missing elements (photos, service areas, descriptions). Why now: The top competitor at #4 has only 3 reviews but ranks above you with a 5.0 rating and likely complete profile data. Effort: Medium. Expected impact: Medium.
